EDUCATION

University of California, Los Angeles, BS in Mechanical Engineering Sep 2023 – Jun 2027

- GPA: 3.57/4.0
- **Relevant Coursework:** Manufacturing, Statics, Thermodynamics, CAD, Circuits
- Expected Graduation: Jun 2027

ENGINEERING EXPERIENCE

Ergonomics Project Engineer, Baja SAE – Los Angeles, CA Sep 2024 – Present
[Documentation]

- Implemented LiDAR scans of drivers and created flexible models in SolidWorks, informing and increasing driver fit by a range range of 15% while maintaining safety and packaging constraints
- Designed and built an ergonomic measurement jig to collect anthropometric data, to validate cockpit layout
- Fabricated light-weight carbon fiber seat and steering wheel

Science Communication Lead, iGEM Foundation – San Diego, CA Aug 2020 – Aug 2022

- Developed and delivered technical curriculum for STEM summer programs; recognized as best counselor
- Co-authored *Power of Synthetic Biology and Biochemistry*; contributed to Gold medal-winning team (2021)

PROJECTS

Rocket Project

- Designed Thrust and Upper Recovery Bulkhead for Internal Structures

Ergonomic Drawers

[Documentation]

- Modeled and fabricated adjustable-height drawers to improve user posture and leg comfort
- Developed detailed technical drawings for fabrication
- **Tools:** SolidWorks, ANSYS, Hand Tools

Faraday Cage Bed

[Documentation]

- Designed and fabricated a bed-frame integrating non-permanent fixtures, hinged access, and programmable LED wake-up system
- Performed structural analysis using ANSYS to validate strength and stiffness assumptions
- Ensured continuous conductivity, allowing for a functional Faraday Cage
- **Tools:** SolidWorks, ANSYS, Arduino IDE, ESP32

Personal Website

[Repository]

- Developed and deployed a personal engineering portfolio to document projects and technical experience
- **Tools:** HTML, CSS, JavaScript

WORK EXPERIENCE

E-Commerce Associate, Whole Foods Market – San Diego, CA Jul 2025 – Sep 2025

- Maintained an average of 90 units/hour, exceeding performance targets by 10%
- Collaborated with cross-functional team to ensure accuracy, efficiency, and on-time fulfillment
- Earned return offer based on reliability and performance

Tutor, Kupanda Kids – San Diego, CA Oct 2020 – Jun 2021

- Provided one-on-one math and English tutoring for underprivileged refugee students

SKILLS

Manufacturing & Fabrication: Welding, Machining, Laser Cutting, 3D Printing, CNC Milling

Design & Analysis: SolidWorks, Fusion 360, ANSYS, Technical Drawings

Programming & Controls: MATLAB, Python, C++, Arduino, ESP32

Tools & Collaboration: MS Office, G Suite, Slack
